Building Classifications Notes and Definitions

Building permit data is compiled from building permits issued by cities and counties. The building classifications used in grouping the building permit data of the preceding tables are as follows:

Residential:

Single-Family housing units include detached, semi-detached, row house and town house units. Multi-family housing includes duplexes, 3-4 unit structures and apartment type structures with five units or more. Each type of housing is included in this report with its corresponding valuation.

Residential Alterations and Additions include alterations, additions and conversions to existing residential structures. (Excludes special installation permits for electrical, plumbing, heating, air-conditioning or similar mechanical work, installation of fire escapes, fire sprinklers, elevators, signs, etc.)

Total Residential includes a sum of total construction valuations from the categories: New Single Family Valuation, New Multi Family Valuation and Residential Alterations and Additions combined.

Non-Residential:

New Commercial includes new hotels and motels, office and bank buildings, stores and other mercantile buildings, parking garages, service stations, and amusement and recreational buildings.

New Industrial includes manufacturing plants and affiliated buildings.

Other New Non-Residential includes churches and religious buildings, medical and institutional buildings, school and educational buildings, agricultural buildings, and miscellaneous Non-Residential structures. Hospital construction permits issued by the California Office of Statewide Health Planning are not included in the private Non-Residential building data contained in this report except where the project may also be permitted by the local jurisdiction.

Non-Residential Alterations includes alterations, additions and conversions to existing Non-Residential structures. (Excludes special installation permits for electrical, plumbing, heating, air-conditioning or similar mechanical work, or installation of fire escapes, fire sprinklers, elevators, signs, etc.)

Total Non-Residential includes a sum of total construction valuations from the above Non-Residential categories: New Commercial, New Industrial, Non-Residential Alterations and Additions, and New Other Non-Residential.

Total All Buildings includes a combined sum of construction valuations from all Total Residential and Total Non-Residential categories.

HVAC and Solar Installations:

HVAC and Solar installations are not included in the scope of the *California Construction Review*. If you are interested in receiving more specific information on our *Energy Permit Summary* report, please contact us at CHF-CIRB@mychf.org. It should be noted that HVAC installations are sometimes not acknowledged independently from other mechanical permit valuations depending upon the reporting municipality and therefore, cannot be tracked with complete accuracy.

** Variations in permit totals and valuations from previously-released California Construction Review (CCR) reports are a result of post-reported County/City activity and/or post-adjusted data submitted to CIRB by the reporting municipality. We will provide revised data in semi-annual and annual reports to reflect the most up-to-date, building permit statistics for the reporting period.*

About the California Homebuilding Foundation

Founded in 1978, the California Homebuilding Foundation (CHF) invests in the future of the homebuilding industry through endowments that provide college and graduate school scholarships and fund research on key public policy issues; compiles and publishes timely construction and new home statistics; provides training seminars; and supports high school courses to encourage young people to choose careers in the industry. The Foundation is the presenter of California's top industry award, the Hall of Fame, which recognizes industry leaders and offers their career examples as an inspiration to others.

According to the U.S Census Bureau a metropolitan and micropolitan statistical area(s) (metro and micro areas) are geographic entities delineated by the Office of Management and Budget (OMB) for use by Federal statistical agencies in collecting, tabulating, and publishing Federal statistics. A metro area contains a core urban area of 50,000 or more population, and a micro area contains an urban core of at least 10,000 (but less than 50,000) population. Each metro or micro area consists of one or more counties and includes the counties containing the core urban area, as well as any adjacent counties that have a high degree of social and economic integration (as measured by commuting to work) with the urban core.
